

Ferrari F1 Hospitality Hub

REQUIREMENT:

Temporary access to the trackside hospitality unit.

The client chose our modular systems for their easy installation and removal - features that timber systems simply couldn't offer.

END RESULT:

Our in-house team managed every stage - from design and manufacturing to installation.

The ramp included a connecting platform and a step unit, both fitted with warm-to-touch, white powder-coated handrails for comfort and safety.

After installation, the client added artificial grass over the surface.

A separate step unit, also featuring the same white powder-coated finish, was included.

We perfectly align the rental with the building's two-week hire period, ensuring a quick and hassle-free setup and takedown.

FEATURES INCLUDED:

- Anti-climbing Infill Handrail - This product safeguards against users climbing or falling through gaps.
- Looped Trombone Ends – Prevents clothes from snagging at the ends.
- Slip-Resistant Mesh Platform - A multi-directional walkway with self-draining steel mesh and a galvanised finish.
- Continuous Handrail - This handrail system ensures that users always have a support to hold onto.
- Adjustable Telescopic Legs - These can be adapted to suit various threshold heights.
- Modular steps - Provides access for able-bodied users and can be a joining addition to a modular ramp installation or an independent unit.
- Custom White Powder Coated Handrails - You can select a custom colour to suit your specific needs. We simply need your RAL colour number, which can be determined using a colour chart.
